

The General Trade union of Public Utilities in Egypt, member of ICEM and PSI calls upon the international community and all human rights organisations, the UN security council, the ILO. and all confederations and organisations of workers to exercise and exert pressure on Israel to bring an end to Palestinian suffering and stop the violent and atrocious aggression on the armless people of Gaza in way to stop the inhumane and criminal massacre that is perpetrated against innocent children through targeting civilians to annihilate and exterminate the Palestinian people so the solution would reside on an immediate ceasefire and opening the gates to convey the humanitarian aids and the treatment of the wounded.

This is aggression will remain as black stigma on the history of the Israeli occupation against freedom fighter moreover it is a flagrant violation against human rights because of targeting innocent armless children women and old , this is unfair and inapproprioinate war so the world has to go forward to study the Franc-Egyptian initiative and also obliging Israel to apply the security council resolution that is calling for immediate cease fire in order to stop the massacre that is destroying the Palestinian people and imposed upon them a tragic and deplorable situation . They are facing the danger of death at every moment, Israel is plotting an inhumane, horrible, and atrocious disaster. The Palestinian people is facing the danger of hunger , death because of lack of medicine , food , and absence of protection against bombardment and also lack of potable water and electricity , they are facing even the insecurity in the UN. Headquarters , there is a must to stop the annihilation war in order to go forward in negotiations and getting back to their tangible and untouchable peace so as to establish two states on for the Palestinians and one for Israelis that live beside each other in peace . Egypt has sacrificed with 120 thousand martyrs for the Palestinian cause and Egypt is still presenting more. This disaster is worrying the whole Egyptian people and their leaders , and the grassroots of its workers , Egypt will never give up its commitments towards the Palestinian cause , it is our eternal destiny , Egypt will support the Palestinian people , so the Political leader from the very beginning of the crises is doing their best to find a solution , Egypt refuses to bargain over its sincerity and loyalty to its nation causes of our Arab homeland , but what is the solution with the Israeli obstinate and supercilious mentality to defy the whole world , we need the whole world to get together to solve this problem and stop the aggression.
