

PUBLIC SERVICES INTERNATIONAL

PSI is a global trade union federation bringing together more than 700 unions representing 20 million working men & women in 163 countries. Our workers deliver public services for the benefit of all: health & social care, municipal services & public utilities such as water & energy.

PSI stands for quality public services, accessible to all. We fight against privatisation, corporate tax evasion and the insidious power of big business over democratic institutions. We stand up for the interests of public service workers within the UN system and across the world, in partnership with civil society and activist organisations.
